INTRODUCTION

The coronavirus disease (COVID-19) is an infectious disease caused by a new strain of coronavirus. This new virus and disease were unknown before the outbreak began in Wuhan, China, in December 2019. 'CO' stands for corona, 'VI' for virus, and 'D' for disease. Formerly, this disease was referred to as '2019 novel coronavirus' or '2019-nCoV.' The COVID-19 virus is a new virus linked to the same family of viruses as Severe Acute Respiratory Syndrome (SARS) and some types of common cold.It was initially reported to the WHO on December 31, 2019. On January 30, 2020, the WHO declared the COVID-19 outbreak a global health emergency. On March 11, 2020, the WHO declared COVID-19 a global pandemic, its first such designation since declaring H1N1 influenza a pandemic in 2009.

The main focus of this project is about online system for monitoring Pandemic Covid-19 in Bangladesh satiation. In this System user puts his or her own user-name, email, phone no , syndrome and there personal comments.

METHODOLOGY

At first user can know our current update of corona virus like- Infected Patient In Whole World, Active Covid Case In Bangladesh, Cured/Discharged Case In Bangladesh, Death Case In Bangladesh [fig-1]. Then user can learn about corona virus and its short history [fig-2]. Next user can learn about the symptoms of Corona virus [figt-3]. Then user can know few prevention against Corona virus [fig-4]. At last part user can gives his own name, email, phone no, select symptoms and his own comments[fig-5].

After submitting the information data it will be stored in database and we can find easily who is sick or who is well. Using our system we can know or learn easily about Corona and its symptoms and its protected way. It'll provide the basic information about the infection and how it spread.

For this system we use html, css, php and Sql database, we use css design in front our home page. Here we add many important picture that people can understand Corona Virus symptoms and think prevention ways. Using our system we can easily know and count Symptom of Covid-19 , Confirmed case , Recovery case, Death case, Count the total number of effective patients in Bangladesh etc.

6 Steps Prevention Against Corona Virus

Wash your hands regularly for 20 seconds, with soap and water or alcohol-based hand rub

Cover your nose and mouth with a disposable tissue or flexed elbow when you cough or sneeze

Avoid close contact (1 meter or 3 feet) with people who are unwell

Stay home and self-isolate from others in the household if you feel unwell

Stay informed by watching news and follow the recommended practices

If you have fever, cough and difficulty breathing, seek medical care early

Tools And Technologies:

Html, Css, Php, MySql database, VS code , Sublime
Text , Xampp. Client server is Web browser.

Final Result:

After Complete our project ,we test it from differenc
device and its shows the correct for every device.
